Authority Backlink Professional Review - Are You Certain You Still Wish To shop for Authority Backlink Professional?

Anyone that owns a web site or has been around the net for a whereas could have heard of the term backlinks and the way vital they're to induce ranked high on the front page of Google.

Therefore I recently bought Authority Banklink Professional in hopes that it wasn't simply another over hyped link building software. The owner of this software Steven Essa claims Authority Backlink Professional will build fifty backlinks from authority .EDU and .GOV sites in but thirty minutes. This can be unbelievable when you concentrate on it may take you well over three hours if you probably did this the ancient means.

Anyway I bought the software downloaded it and while not having any high expectations I started enjoying around with it. I could not believe my eyes inside forty eight hours I had two net pages ranking on page four of Google. Currently simply thus you recognize these pages had never ranked above page fifteen on Google.

Over the following few days they continued to climb up the ranks. They're currently on pages one and a pair of and that i'm talking regarding terribly competitive keyword phrases.

Therefore here's how it works.

Authority Backlink Professional goes out and searches for blogs that are primarily based round the keyword you wish to rank for once it completes its search you're than presented with a listing of blogs that are already ranked high in Google for your keyword phrase. Authority Backlink Professional can than automatically insert your comment and web site onto those high ranking blogs.

Therefore what most backlinking software will try this therefore what is the massive deal?

If you're acquainted with search engine optimization than you must understand not all backlinks will be treated equally. You see .EDU and .GOV sites have abundant higher link juice than traditional backlinks. One backlink from a .EDU would be higher than obtaining ten backlinks from varied.com sites.

Primarily Google treats these as authority sites as a result of most .EDU and .Gov domains are employed by universities, schools and government institutions etc... Thus Google regards all of the knowledge on these sites as highly informative.

Why Authority Backlink Pro is so powerful.

Because you can't apply traditional link building methods with these sites it is very difficult to get free backlinks. Links from .EDU and .GOV domains are so powerful there are sites on the internet renting out each backlink for up to \$100 a month.

Here's where it gets interesting Steven Essa has included a special feature that searches for .EDU and .GOV top blogs ranking high on Google and allows you to post your website and comment directly to these high authority sites, that a perceived by Google as high value websites giving you an even higher backlink score than regular sites.

Lets face it higher page ranking means that a lot of traffic and a lot of traffic equals a lot of sales. The truth is anyone already applying this tool to their on-line business is well previous you on the page rankings.
